

Ready for Reawakening

AHC Group Leadership Workshops

AHC GROUP, INC.

Experts in Corporate Strategy and Social Response since 1981™

Achieving Results Workshop Series

The AHC Group ‘**Achieving Results**’ leadership benchmarking workshop series is a process of transformational corporate learning, featuring the experiences and innovations of AHC Group Senior Associates, clients, and our global leading Corporate Affiliate Program member organizations. Since 1990, this ongoing benchmarking workshop series **has provided an intimate peer-to-peer sanctuary of leadership mentoring** and high-level executive dialogue of the environmental issues most relevant to you and your firm.

We strive to **provide an environment of concrete leadership networking and exchange of best practices** in all sectors of industry to reduce risk and create business value. This carefully crafted and time-tested workshop series has been organized to provide a synthesis of emerging corporate strategy needs in a thematic workshop series, including environmental sustainability, ESG matters, and innovation.

Built upon a foundation of pragmatic and proven leadership training values, our executive workshops provide a “Sanctuary of Trust” as stated by our founder in our originating mission statement in 1985. Piasecki noted then: “Leaders like to learn from leaders.” And we have found that more compelling as the needs of business become more complex and immediate.

Let's turn things around, and build a better future, together!

The founder’s vision of our purpose has remained steady in the eyes of our key ongoing Member companies, many who enroll three of their integrative leaders per session. While the talks are updated each session, the overall mantra of covering corporate change, profit, and social needs remains our compelling integrative theme. Since the audience involves a mix of board members, CEOs, and top senior executives, as well as a mix of promising new professionals, the discussions prove of special value beyond the actual case materials.

- Workshops are held twice a year.
- Attendance is capped at 60 attendees.
- A mix of leaders from a range of a dozen industry segments are invited. (This includes senior executives and top managers from a wide spectrum of firms by design. A typical setting will include speakers from petroleum giants, clean energy firms, big Pharma, key utilities, and the dominant transportation companies in rail, auto, and aerospace.)
- Content is developed in an actively interactive fashion with the speakers and the firms hosting.

Since beginning the workshop series in the late 1980s, **we kept focus on building a better future** by building better leaders, businesses, thru cross-sector collaboration.

You see **a record of our achievements on the Amazon book pages of our group founder and key facilitator Bruce Piasecki**. You can also visit the Wikipedia pages of some of our recurrent personalities present like Bill Novelli, Sandra Beach Lin, Leo MacKay, and others noted in our Business and Society podcast series on the One Planet Podcast broadcasts before over two hundred universities.

Since 2020, **we've grown in a new generation of leaders**, thanks to inputs from our co-chairs at Standard & Poors, the CEOs of GlobeScan and Legacy Seed, and our major host and member Lockheed Martin, among others.

We exist to cultivate leadership talent, corporate strategy, and action by providing a selective cross-market sector member-based forum.

This design enables you to learn intensively from each other. For some, this also builds a personalized network of support outside your existing firm.

We supplement the ongoing corporate members with a handful of thought leaders as speakers. The enrollment fee of \$900.00 for individuals covers the costs of the hotel, materials development, and you often receive the books of some of the thought leaders presenting. Member companies bring their leaders by supporting this venture with annual \$15,000 memberships.

The Corporate Affiliate member companies offer three quarters of the content in live case studies of their leadership.

One or two thought leaders from outside the membership round out the agenda, stimulating further executive learning and development on the most pressing and urgent social and business issues of the day. (Including topics of climate response, sustainability and environmental, social and governance performance.)
